

WEEK 4

Aim:

To develop a dynamic webpage using HTML, CSS, and JavaScript with login validation and dynamic display of greeting and login time.

Description:

This experiment demonstrates the use of JavaScript to add dynamic functionality to a webpage. A login page is created with username and password validation. On successful login, the user is redirected to a placement dashboard. The dashboard dynamically displays a greeting according to the current time and the login time.

Program:

Dynamic Webpage Using JavaScript

Program Code:

1.Login Page:

```
<html>

  <head>

    <title>Login-Page</title>

    <meta name="viewport" content="width=device-width">

    <meta charset="UTF-8">

    <style>

      body{
```

```
    background-color: aliceblue;
    background-image: url("./bgimage.jpg");
}
.heading{
    text-decoration: solid;
    color:white;
    text-align: center;
    padding-top: 20px;
}
.container{
    margin-left: auto;
    margin-right: auto;
    height: 300px;
    width: 300px;
    background-color: lightsteelblue;
    box-shadow: 10px 10px 20px grey;
    border-radius: 20px;
    align-self: center;
    display: flex;
    flex-direction: column;
    margin-top: 80px;
}
.container h3{
    align-self: center;
```

```
}  
  
input{  
    display: block;  
    margin-left: 10%;  
    margin-right: 10%;  
    height: 30px;  
}  
  
#btn{  
    background-color: blue;  
    position: relative;  
    width:80%;  
    align-self: center;  
    margin-top: px;  
    color: white;  
    height: 30px;  
  
}  
  
label{  
    margin-top: 20px;  
    color: blue;  
    margin-left: 10%;  
    margin-right: 10%;  
}  
  
#error{  
    color: crimson;
```

```

        align-self: center;

    }
</style>
</head>
<body>
    <h1 class="heading">ANITS - Central Placement Portal</h1>
    <div class="container">
        <h3>User Login</h3>
        <label>Username</label>
        <input type="text" id="name1" placeholder="Enter your username">
        <label>Password</label>
        <input type="password" id="password" placeholder="Enter your
Password">
        <p id="error"></p>
        <button onclick="loginValidity()" id="btn">Login</button>

    </div>
    <script>
        function loginValidity(){
            let uname=document.getElementById("name1").value.trim();
            let password=document.getElementById("password").value.trim();
            let defaultUname="Lasya";
            let defaultPassword="las@2206";
            let error=document.getElementById("error");
            error.innerHTML="";

```

```
if(uname==""){
    error.innerHTML="*UserName is required";
    return;
}
if(password==""){
    error.innerHTML="*Password is required";
    return;
}
if(uname==defaultUname && password==defaultPassword){
    window.location.href="success.html";
}
else{
    error.innerHTML="<b>Invalid UserName or Password.</b>";
}
}
</script>
</body>
</html>
```

2. Success Page:

```
<html>
<head>
    <title>Success-Page</title>
    <meta name="viewport" content="width=device-width">
    <meta charset="UTF-8">
    <style>
```

```
body{
    background-color: aliceblue;
    background-image: url("./bgimage.jpg");
}

.heading{
    height: 180px;
    display: flex;
    align-items: center;

}

.heading img{
    height: 100px;
    width: 100px;
    margin-left: 20px;

}

.text{
    flex:1;
    display: flex;
    align-items: center;
    justify-content: center;
    flex-direction: column;
    color: azure;
```

```
}  
.navbar{  
  margin-top: 0px;  
  height: 50px;  
  display: flex;  
  flex-direction: row;  
  justify-content: space-around;  
  background-color: purple;  
}  
a{  
  color: white;  
  text-decoration: none;  
  margin-top: 10px;  
}  
.box{  
  margin-top: 50px;  
  height: 500px;  
  width: 600px;  
  margin-left: auto;  
  margin-right: auto;  
  background-color: lightblue;  
  box-shadow: 10px 10px 10px grey;  
  display: flex;  
  flex-direction: column;  
  justify-content: space-around;  
}
```

```
.inner{  
    background-color: aliceblue;  
    border-left: 5px solid yellow;  
    margin-left: auto;  
    margin-right: auto;  
    width: 90%;  
    align-self: center;  
  
}
```

```
li{  
    margin-left: auto;  
    margin-right: auto;  
    color: blue;  
    margin-left: 8px;  
}
```

```
#greeting{  
    color: blue;  
    margin-left: 10px;  
}
```

```
#loginTime{  
    color: blue;  
    margin-left: 10px;  
}
```

```
.f1{  
    background-color: purple;  
    height: 50px;
```

```
        display: flex;
        align-items: center;
        justify-content: center;
        margin-top: 50px;
    }
    .fl p{
        color: white;

    }
</style>
</head>
<header>
    <div class="heading">
        
        <div class="text">
            <h1>Anil Neerukonda Institute of Technology & Sciences</h1>
            <h2>Campus Placement Portal</h2>

</html>
```

Details About Program:

Saved in: Week 4 folder of the repository.

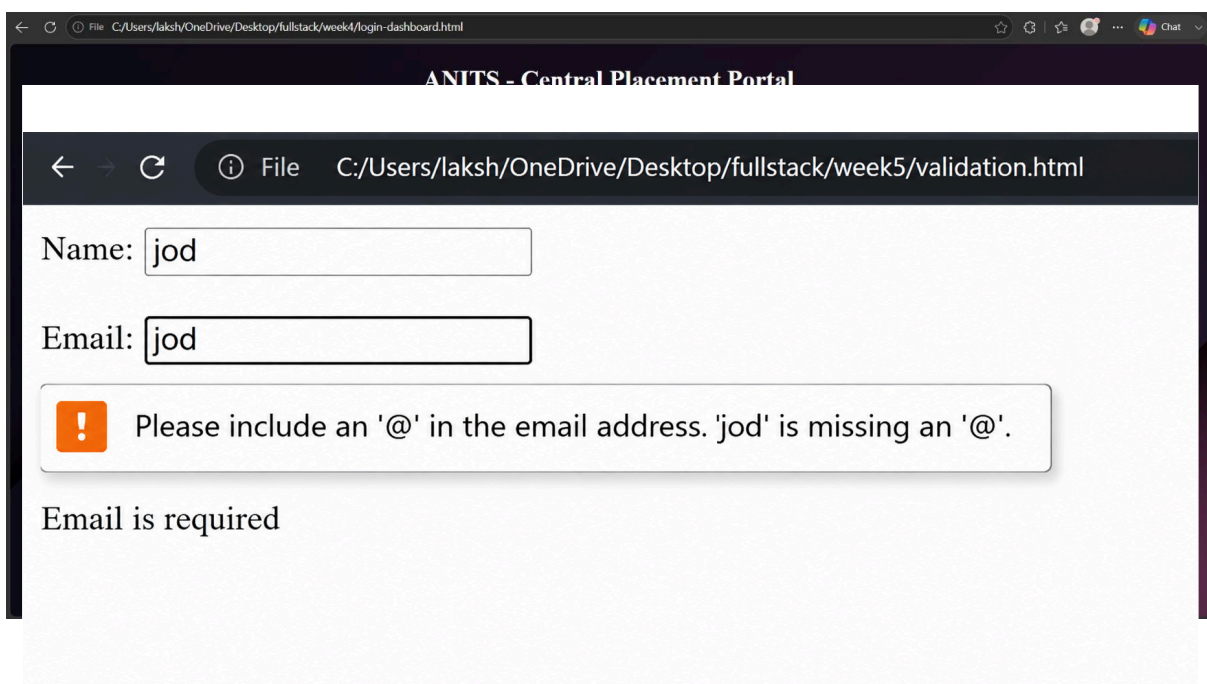

Files used: Login page and Success Dashboard page.

Technologies used: HTML, CSS and JavaScript.

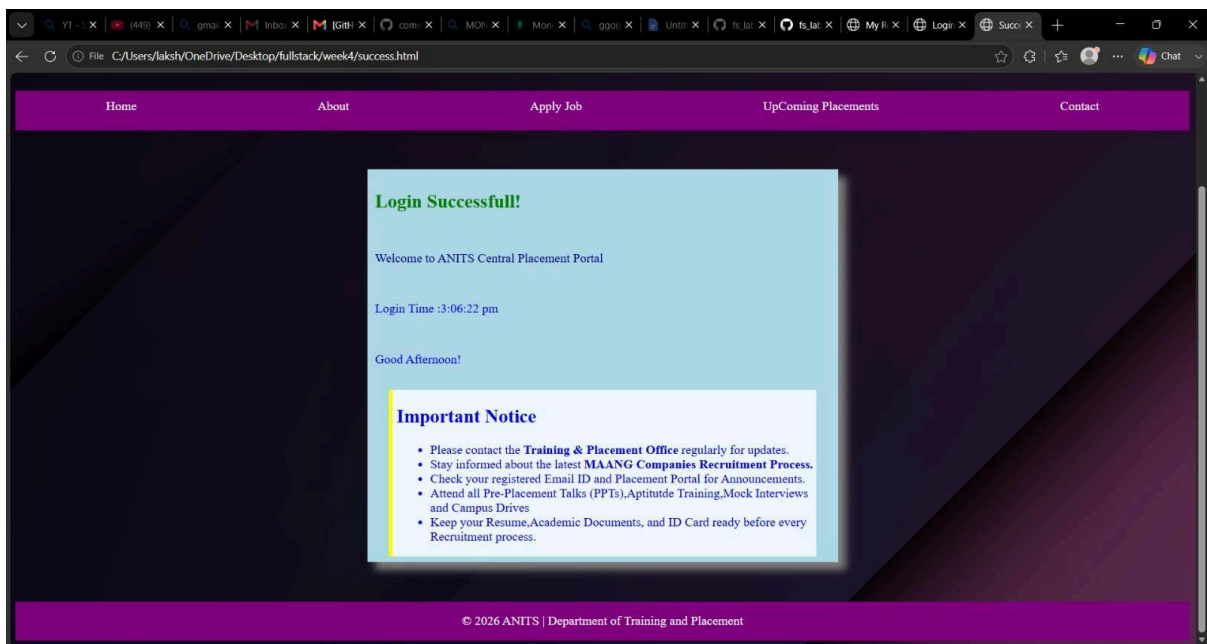

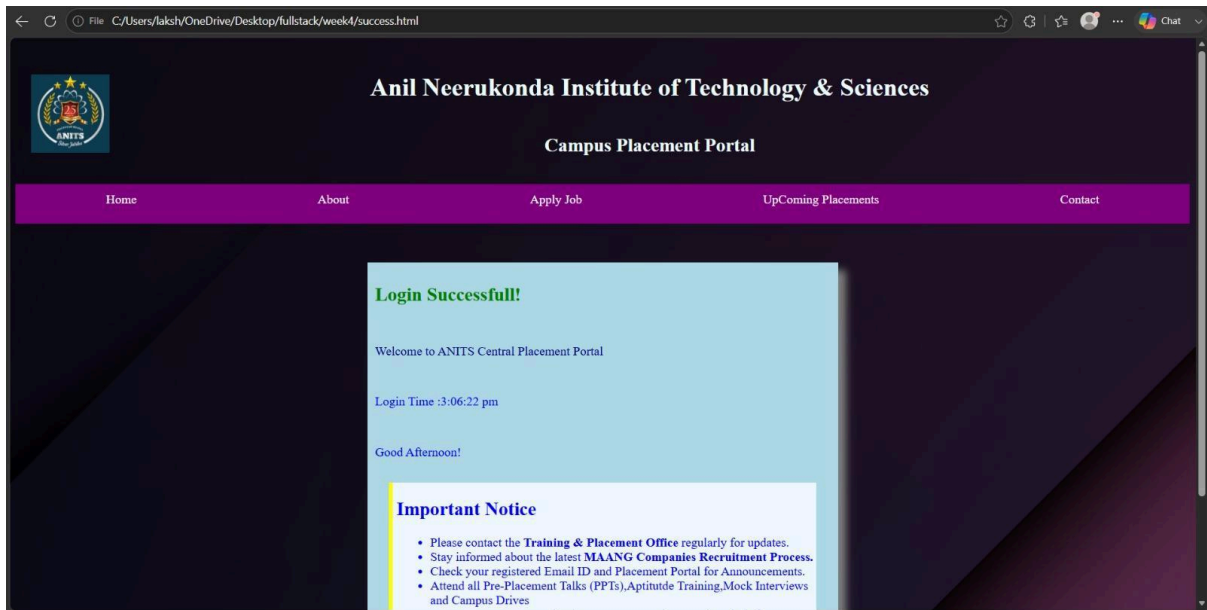

Execution: The login HTML file is opened in a web browser.

Working: The user enters the username and password. JavaScript validates the details. On successful login, the success dashboard is displayed with the current login time and an appropriate greeting.

Output:

The screenshot shows a web browser window with the title "ANITS - Central Placement Portal". The address bar displays the file path "C:/Users/laksh/OneDrive/Desktop/fullstack/week5/validation.html". The form contains two input fields: "Name:" with the value "jod" and "Email:" with the value "jod". Below the email field, there is a red warning icon and a message: "Please include an '@' in the email address. 'jod' is missing an '@'." Below this message, the text "Email is required" is displayed.

Result:

The dynamic webpage was successfully developed using HTML, CSS and JavaScript with login validation, dynamic greeting and login time.
